

Automatic Speech Recognition

- Class time: Mondays 2-5
- Classroom: F3015
- Text Book: B. Gold and N. Morgan, “Speech and Audio Signal Processing”, Wiley, 2000

Reference: A. Oppenheim and R. Schafer, “Discrete-time Signal Processing”.

- Grading Policy
 - homeworks 40%
 - midterm 20%
 - final 30%
 - class participations 10%
- It is encouraged, when not being able to completely solve a problem in homeworks or exams, to give partial answers. Organize your work properly to show the grader that you are on the right track. Conversely, an answer without any proper explanation or reasoning won't get any score.
- A class email list will be used for related announcements. You are welcomed to discuss with me via emails about class materials. Note that some questions may end up being answered in the class if they are frequently asked.
